TO WHOM IT MAY CONCERN

Subject: Questionnaire on the service demand for European Centres of Research and Innovation in Brazil, China and the United States

Dear Madam/Sir,

The European Union is funding the projects CEBRABIC, ERICENA and NearUS which are to establish European Research and Innovation Centres in Brazil, China and the United States respectively.

These Centres will provide a range of services to support collaboration in research, innovation and business to customers such as European SMEs and start-ups, research and technology organisations, universities and national and regional authorities.

The three projects are conducting a survey to gain a better understanding of the needs of prospective customers in order to design an efficient set of services. I would therefore appreciate if you could facilitate the work of the projects, in particular when they contact you with regard to the collection of information through a questionnaire.

In case you require additional information, please send an email to contact@eucentres.eu.

Yours sincerely,

Kostas Glinos
