

The German-Israeli Water Technology Cooperation Program

CALL FOR JOINT PROPOSALS for 2016

1. Objectives of funding and legal framework

1.1 Objectives of funding

Within the framework of the German-Israeli cooperation in Water Technology Research, the German Federal Ministry of Education and Research (BMBF) and the Israeli Ministry of Science, Technology and Space (MOST) invite proposals for bilateral R&D projects.

The research shall focus on solutions to the water problems in Israel and its direct neighbourhood and/or Germany. The research should be multidisciplinary and be applicable to the needs of the water sector. In addition to scientific partners, projects should preferably include industrial partners as well as related stakeholders.

Qualifying scientific applicants in this framework may receive R&D grants, respectively, from BMBF and MOST according to the applicable national funding procedures and regulations.

1.2 Legal framework

Projects can be funded under the terms of this call and of the agreements concluded between BMBF and MOST. In this respect, the general regulations for funding, including the consideration of intellectual property rights formulated by the Ministries for all BMBF-MOST research co-operations, will be applied also to this field. In addition, for the German partners to be funded under this call, the standard BMBF-guidelines for grant applications on expenditure or cost basis, respectively, must be followed in addition to the general regulations. **Submitting a proposal does not automatically entitle applicants to a grant.** Rather, grants will be awarded to proposals selected after the parties to this call have assessed the proposals according to the criteria set out in paragraph 9 of this call.

It is the intention of the parties issuing this call to fund research proposals selected hereunder for the three-year duration of the project. However MOST funding must be approved on an annual basis, with the funding for the second and third years to be approved in accordance with the provisions of the research contract. The parties to this call reserve the right not to fund a second or third year of work for scientific-professional, administrative or budgetary reasons.

This call is subject to cancellation in the event of unforeseen budgetary constraints.

For the Israeli Researchers:

A researcher who intends a sabbatical leave in the first year of the project cannot be approved as a principal investigator (PI) of the research proposal. A PI who intends a vacation or absence of more than three months should request permission from MOST in advance (through the relevant R&D Authority). A substitute to the PI will not be approved in the course of the first year.

2. Subject of research

Research projects will be carried out in the following research areas:

- Industrial Wastewater: Recycling, Reduction and Reuse
- Sustainable Urban Water Management

Each submitted research proposal needs to indicate specifically to which of the above research areas it is related.

The objectives of the German-Israeli Water Technology Cooperation Program are as follows:

- To improve the water situation in Israel and its direct neighbourhood and/or Germany. Transferability of the results to comparable regions should preferably be ensured.
- To facilitate access to new markets for Israeli and German enterprises in the water and environmental sector.
- To support and strengthen bilateral and multilateral cooperation in the water sector as well as cooperation between science and industry.

Each submitted research proposal needs to indicate how it addresses the above mentioned objectives of the German-Israeli Water Technology Cooperation. In particular, the proposals need to specify how the interaction between German and Israeli research groups will foster innovation (e.g. block diagram or PERT network diagram) and how integration will be managed and maintained during the project (e.g. governance structure, joint workshops).

BMBF and MOST further agreed that future projects may also deal with water problems in third countries particularly in the arid, semi-arid, and tropical regions, enabling both countries to make a joint contribution to the Sustainable Development Goals (SDGs) agreed in 2015 at the UN-Summit in New York. For that purpose, both countries want to pool their water technology expertise for developing appropriate technologies and know-how in the research areas listed above.

Priority will be given to projects based on novel ideas. It is recommended that working groups include academic partners, industrial partners and end users.

3. Eligibility

Israel: Grants can be awarded to applicants from academic institutions, meaning those accredited institutions of higher learning in Israel, according to the Council for Higher Education Law, 1958, or public research institutes with experience in the

relevant fields. For the purposes of this call, a "public research institute" means a research institute whose main activity is the advancement of cutting-edge scientific knowledge, which possesses appropriate infrastructure and equipment and which employs researchers who, inter alia, publish articles related to their research in leading scientific journals and who present their research at international symposia.

Israeli industry partners are encouraged to participate in research projects at their own cost but are not eligible to apply for grants.

According to the procedures of the Water Technology Cooperation Program, **Israeli scientists who serve as investigators (Principal Investigators (PI's) or Co-Investigators (CI's)) in ongoing projects within this program, are excluded from submitting and participating in a new proposal and project (either as PI or CI) within the frame of this call, until their ongoing project is finished.** In such a case, the results achieved in their ongoing projects shall be attached to the new proposals and will be used to evaluate their abilities to accomplish the tasks and achieve the goals of their new proposals.

Germany: Research proposals may be submitted by German-based commercial companies, institutions of higher education, non-university research establishments as well as public institutions at municipal, state or federal level. The participation of small and medium-sized enterprises (SMEs) is expressly welcome.

For Both German and Israeli Applicants:

The application must include a research plan in one of the areas of research specified in this call, which will be carried out in Israel by at least one senior researcher who is a permanent employee of the applying institution or on track for tenure in the applying institution.

The project proposals must include a detailed description of the joint work-plan as well as a calculation and justification of the budget, for both the Israeli and German teams.

Additionally, applicants are referred to the general project terms found at <http://www.bmbf.de/de/1531.php>

Joint German-Israeli Cooperation is Obligatory

The proposed project **must be prepared and carried out jointly by the Israeli and the German project partners.** For this purpose, BMBF and MOST will consider providing a grant that covers the travel expenses for one short visit of one of the potential research partners to either Israel or Germany, for the purpose of preparing the joint proposal. Such grants will not exceed 1,500 Euro.

Potential research partners interested in such a travel grant may submit their informal request by e-mail to the relevant contacts in Germany or Israel (see paragraph 11).

4. Regional Cooperation

Israeli partners may include researchers from neighbouring states and areas in their proposed research teams if the relevance of the expected project results may be increased thereby.

5. Duration of Project

The research should be planned for a period not exceeding three years.

6. Budget

The overall BMBF/MOST budget for the Israeli participation in this call for proposals is up to EURO 1,000,000 of which MOST will contribute up to EURO 250,000.

In Israel:

Eligible institutions in Israel may receive grants covering up to 100% of the additional, eligible, research-oriented expenses incurred by the project, which may be used for the following purposes:

- (1) Stipend or salary for PhD students, post-doctoral fellows, technicians and/or laboratory workers (i.e. a temporary position up to 2 years) retained specifically for the purpose of the project, not including salaries for permanent staff and PI's;
- (2) Consumables. In case they exceed 750 Euro, a detailed explanation regarding their necessity and quantities is required;
- (3) Small scale equipment which is only needed for the specific research project. MOST will enable purchase of computers or laptops only in special cases in which they are part of the research project or are of unique capacities needed for the specific research;
- (4) Travel and visiting costs;
- (5) Joint seminars and workshops.

Subject to the overall budget of this Call, there is no formal cap in regard to the total cost of individual proposals. Proposals submitted to MOST must include a detailed project budget for the Israeli team.

All procedures and activities under this Call or the Israeli projects approved hereunder, including the eligibility of institutions via which applications must be filed, are subject to the standard MOST Procedures Regarding International Collaborative Scientific Projects and Scholarships Funded by MOST and to the MOST Standard Contract for Scientific Projects (both documents referred to hereinafter as "the standard terms").

Applicants are required to familiarize themselves with the standard terms before filing an application under this Call; filing an application constitutes a declaration that the applicant has done so and agrees to be bound by the provisions thereof.

In Germany:

Funds for German partners will be awarded as non-repayable project grants. The grants can be spent to cover the cost of staff, materials, and equipment. No funding can be provided for building investments.

Grants for universities, research and science institutions and similar institutions are calculated on the basis of the eligible project-related expenditure.

Grants for German commercial companies are calculated on the basis of the project-related costs eligible for funding, up to 50% of which can as a rule be covered by grants, depending on the project's nearness to application. In the case of collaborative research projects, the European Union's Community Framework

allows differentiated rules on extra percentage points for small and medium enterprises (SMEs), which may result in a higher rate of funding.

7. Key Dates

Final date for submission of proposals: May, 5th 2016 at 15:00 (local time).

8. Guidelines for the Submission of Joint Research Proposals

Application forms are obtainable at MOST website (www.most.gov.il), from the Research Authorities of the universities in Israel and from the website of the German-Israeli Cooperation (www.cogeril.de). The use of the updated forms is obligatory.

Instructions for Israeli research teams:

Israeli PI's should submit proposals in English by email using the application form to the following email address: Germany@most.gov.il (in "pdf" format duly signed, along with a working copy in "doc" format without signatures). **The proposals must actually reach the abovementioned email address by Thursday, May 5th 2016 at 15:00** (local Israel time), **and will not be accepted under any circumstances after the specified date and hour.**

Because of technical constraints, an email over 7 megabytes will not be received. If the email and its attachments exceed 7 MB, it must be split. Shortly after submitting the email the applicants should receive an automatic reply acknowledging its receipt. If an email confirming receipt is not received, the applicant must approach MOST contact persons detailed below to make sure the email was duly received. **It is solely the sender's responsibility** to receive confirmation that the email was actually received, whether by automatic reply or personal confirmation. As technical problems are possible, **it is strongly recommended to submit the application well in advance of the application deadline.**

A valid project application consists of the application form **duly filled in and signed**, together with all the necessary application documents required from each side of a joint research team, submitted respectively to the Project Management Agency in Germany and to MOST in Israel. **If the applications are not duly received both in Germany and in Israel by the date and hour indicated above, the project will not be accepted.**

In addition, Israeli PI's **should send also 2 hard copies** of their proposals by **Tuesday, May 10th, 2016** to the following MOST address:

Mr. Avi ANATI

Deputy Director General for Planning and Control

Ministry of Science, Technology and Space

"German-Israeli Water Technology Call for Proposals 2016"

Clermont Ganneau St., Begin Government Offices

Building 3, 3rd Floor, Room 309

P.O.B. 49100, Jerusalem 9149002

Tel: 02-5411170/173/800

E-mail: avi@most.gov.il

Duly signed proposals may only be submitted via the Research Authorities or the management of the eligible institutions by which the projects are to be carried out.

The German partner should use the electronic submission system “pt-outline” to submit the electronic version of the joint proposal:

<https://secure.pt-dlr.de/ptoutline/app/ISRAEL2016>

9. Evaluation and Selection

Evaluation of the project proposals will be based on the following criteria:

- Relevance to the topics and objectives as mentioned above;
- The soundness of the proposed approach;
- Originality, novelty, multi-disciplinarity, and scientific quality;
- The adequacy of the facilities;
- The capability of the investigator(s) to carry out the proposed research;
- Added value of the cooperation;
- Participation of industrial partners, stakeholders, problem owners and end users;

The proposals will be pre-evaluated and rated by international external reviewers. In accordance with the procedures of the Cooperation Program, all the proposals will be evaluated for final ranking by the Joint German-Israeli Program Committee.

The number of proposals to be approved by Ministries under this call will be determined after evaluating the project proposals in view of budget requirements and constraints.

Applicants of proposals, which are positively evaluated and which complement one another, may be requested to collaborate and prepare a joint project proposal.

If a joint German-Israeli research proposal is recommended by both ministries under this call, the **German partner** will be requested to **file a full proposal** with detailed budget justification **according to the national German regulations** for their part of the work-plan in the joint project. Approval of the joint German-Israeli research proposal hereunder is subject to the approval of the German partner's full proposal by BMBF. Use of the electronic application system “easy-online” is obligatory for the application to BMBF only in this second stage of the application process.

10. Contracts

Upon approval of a research grant by the official authorities in Germany and in Israel, a research contract will be signed between MOST and the institution of the Israeli principal investigator (example of the contract can be found on the MOST website – www.most.gov.il).

11. Contact Information

For additional information contact the following local offices:

In Germany on behalf of the Federal Ministry of Education and Research (BMBF):

Dr. Leif Wolf
Project Management Agency Karlsruhe
Resources and Sustainability (PTRN)

Karlsruhe Institute of Technology
Hermann-von-Helmholtz-Platz 1
76344 Eggenstein-Leopoldshafen

Deputy Director, Division for International Relations
Tel: ++972-2-5411812
Fax: ++972-2-5825725
Email: ronig@most.gov.il

12. Young Scientists Exchange Program (YSEP)

Young scientists are encouraged to participate in the exchange program that was initiated by BMBF and MOST in the framework of the German-Israeli Water Technology Cooperation Program. This is an open call for young Israeli and German scientists for a training period in the partner country for up to 6 months, but not less than 1 month. Funding will be provided to cover all necessary expenses of the applicant's visit abroad, according to the provisions of the YSEP.

Applications for YSEP must be submitted in accordance with the terms and information provided on the following websites:

www.cogeril.de

www.most.gov.il

Bonn, 28th of January 2016
Dr. Helmut Löwe,
Federal Ministry of Education and
Research (BMBF)

Jerusalem, 28th of January 2016
Mr. Roni Goldberg,
Ministry of Science, Technology and
Space (MOST)
